# THE Gleichen Call

EIGHTEENTH YEAR, NO. 41-42

GLEICHEN, ALBERTA, WEDNESDAY, JANUARY 7, 1925

SUBSCRIPTION \$2.00 A YEAR

GLEICHEN LODGE  
A.F. & A.M.  
INSTALL OFFICERS

The Gleichen Lodge A. F. and A. M., No. 36, held their installation of officers on St. John's night, Dec. 27, when the following officers were installed:

OFFICERS GLEICHEN LODGE 1925

W. Bro. W. T. Scott.....W.M.  
W. Bro. L. Cuthbert.....L.P.M.  
Bro. E. W. Taylor.....S.W.  
Bro. R. S. McQueen.....J.W.  
Bro. A. G. B. Lewis.....Sec'y  
R. W. Bro. A. R. Yates.....Treas  
Bro. F. M. Ross-Gibney.....Chap  
Bro. H. R. D. Robson.....Registrar  
Bro. G. Snideman.....S.D.  
Bro. T. Robinson.....J. D.  
Bro. W. W. Sanders.....D.C.  
Bro. J. W. Eggle.....Organist  
Bro. A. C. Park.....J.S.  
Bro. G. E. McCullough.....S.S.  
Bro. J. L. Luman.....L.G.  
Bro. W. W. Brown.....Tyrer  
COMMITTEES

AUDITORS—W. Bro. P. Maclean  
and Bro. H. R. D. Robson

TRUSTEES—W. Bro. H. Scott, W.  
Bro. T. H. Beach, W. Bro. Fergu-  
son and Bro. W. W. Brown

FINANCE—W. Bro. P. Maclean, Bro.  
E. W. Taylor and H. D. R. Rob-  
son.

CHARITY—W. Bros. H. Scott, T. H.  
Beach and Duncan McLean

SOCIAL—Bros. R. S. McQueen, W.  
W. W. Brown and E. W. Tay-  
lor

After the installation the lodge in a post-haste style exemplified the Fourth Degree of roast turkey, supper and other delicacies too numerous to mention at which Past Master T. H. Beach was toast master, which duty he performed as only Harry can. It was nearly train time when the meeting broke up and went to the train to bid the visiting brethren good-by.

Owing to the severity of the weather and conditions of the roads many were not present as otherwise would have been, but what they lacked in numbers was made up in enthusiasm.

One gratifying feature of the meeting was that Bro. Yates, the treasurer, in his speech presented the lodge with the deed of the hall property, stating that the mortgage was fully paid, and also a good balance in the bank.

WEDDING BELLS

The marriage of Miss Marian Ida Cochrane to Mr. Rupert King Hunter of Gleichen, is announced to have taken place Christmas eve. At the home of the bride's parents in the presence of close relatives, at Leed's, Quebec. The bride is well-known to Gleichen people having been connected with the Gleichen telephone central staff, and everyone knows Rupert, being a partner of Riley & Hunter's Garage since he left the Gleichen Public School. The happy young couple are expected home in about a month and their friends are already hunting up musical instruments.

At last Gleichen has a full-fledged hotel in operation, and one that none need be afraid to recommend to their friends. On New Year's day the new "Gleichen Hotel" opened with full license, including a beer license, with Mr. John Rioux as proprietor, who has had many years experience in the hotel business in Calgary, and is starting off in fine shape. The hotel is newly furnished throughout, and is as neat and clean as any person could wish for. It is well heated and has bath rooms on each floor. The rooms are all neatly furnished and appear very cosy. Other improvements are to follow, but it is good to know that Gleichen once more has splendid accommodation for the travelling public.

## OPENING OF GLEICHEN'S NEW HALL A GRAND SUCCESS

### 22nd BATTERY ENTERTAINERS PAR EXCELLENT

#### REAL MIDNIGHT FOLICK

December 31st, 1924, will long be remembered by the people of Gleichen and district for on that date Gleichen's new Community Hall was officially opened and one of the finest balls ever given in Gleichen was put on by the members of the 22nd Battery C.F.A.

Punctually at 9 o'clock p.m. Mr. T. H. Beach, president of the Gleichen Community Hall Association, and His Worship L. Michael, the mayor of Gleichen, took the platform admid a fanfare of trumpets sounded by Sergt. E. W. Salmon and Drummer Chas. Woods.

Mr. Beach in a few well chosen words handed the key of the Community Hall to Mayor Michael, who accompanied by Mr. Beach and Major A. G. B. Lewis, proceeded to the front door and performed the ceremony of officially opening the hall. Returning to the platform the mayor declared the hall officially opened and in a short speech presented to Mr. Beach a beautiful golden key, emblematic of the key of the town, amid great enthusiasm and hand clapping from the crowd present.

Immediately after the official opening the ball started with a "Grand March", led by the Officer Commanding the Battery and Mrs. Michael and Mr. T. H. Beach and Mrs. Lewis, about sixty couples taking part in this march. Dancing continued until 11:45 p.m., when caps, favours, confetti and an assortment of noise-makers were sold to dancers preparatory to ushering the New Year in. At 11:55 o'clock "Lights Out" was sounded by the trumpeters, when the lights in the hall were extinguished. The orchestra here broke into a waltz when practically everyone present danced until punctually at 12 o'clock (midnight) the trumpeters sounded "Reveille", ushering in the year 1925. The lights were turned up and the crowd went wild. The hall was covered with confetti and paper streamers and the noise of horns made conversation impossible, in fact at 12:20 when Mr. Beach commenced to auction the lunch baskets he had great difficulty in making himself heard.

The hall was tastefully decorated with flags, bunting and crossed swords, a machine gun being placed each side of the orchestra platform. It was found impossible to build the gun pit as an 18-pounder gun could not be got through the doors.

The local orchestra, composed of Sergeant Lewis, violin; Quartermaster Sergeant Eggle, piano; Gunner Ferrier, saxophone; assisted by Mr. Bateman, cornet, and Mr. Young, drum, of Calgary; are to be congratulated on the brand of music supplied everyone present remarking that it was as good as any ever heard in Gleichen, and the time was perfect.

The piano presented to the Gleichen Community Hall by the Gleichen Women's Institute contributed in no small measure to the quality of the music. It is a splendid piano and has a very fine tone.

The dance broke up at 3:30 a.m. with the playing of the National Anthem.

The members of the 22nd Battery wish to thank the following gentlemen for their kind assistance:

Mr. D. Hutcheson, who handled the local Board of Trade took it up and a committee was duly appointed to look into the matter, but time and again failed, yet Mr. Beach proved the outstanding member of the committee and despite having one scheme after another knocked in the head finally struck on the plan to get a sufficient number of men to give known here in many years.

Mr. Thos. Henderson, who took the tickets at the door.

### Firemen's Annual Supper and Ball

FRIDAY, JANUARY 16

#### EXPECT SOMETHING EXTRA SPECIAL

At 9 o'clock that evening they are arranging also to give a big dance in the main hall and the public will be invited to attend and assured of having a good time.

The firemen have decided to give the entire proceeds of the dance to the Community Hall Association to assist in paying off the indebtedness of the hall.

The supper and mid-night lunch will be supplied by the Gleichen Women's Institute.

A five-piece orchestra has been secured for the evening, and everything possible will be done to see that all who attend enjoy themselves.

#### POPULAR YOUNG GLEICHEN GIRL PASSES AWAY

The death of Miss Thelma Lee Steed, daughter of Mr. and Mrs. A. A. Steed, on Tuesday night, Dec. 23, 1924, was cause for much sorrow among her many Gleichen friends, as well as her parents and immediate relatives, as she was very well-known and generally liked by all for her obliging and courteous manner in the Gleichen Telephone Central, where she had been engaged since last May.

She was born in Calgary nineteen years ago and for a number of years resided with her parents on their farm between Strathmore and Na- maha.

For sometime past she had suffered with heart trouble, and a few weeks ago was taken to the Gleichen Hos- pital, where pneumonia developed, which finally resulted in her death.

Besides her parents the deceased leaves three sisters and three brothers to mourn her loss, and to add to the great bereavement her father was so ill at home he was not able to attend the funeral or visit his daughter during her illness.

The funeral took place at Gleichen on Saturday afternoon, Dec. 27, and was well attended, although many others from Namaka would have been present had the roads permitted.

The service was held in the Union Church by members of the Latter Day Saints, after which a procession followed the remains to the Gleichen cemetery where the last sad rights were performed.

There were many beautiful floral offerings, among which the following were noted:

Father, mother and family.  
Mrs. St. J. Anderson, Strathmore.  
Mrs. W. J. Brown  
Gleichen and Namaka Telephone staffs.

Mr. and Mrs. C. Bartsch.  
Mr. and Mrs. J. Sanders and family  
Mr. and Mrs. McEntee and girl.  
Miss Barton and Miss E. Anderson.

Mr. and Mrs. A. A. Steed desire to express their most sincere thanks to all who showed so much kindness to their daughter during her illness and to themselves and family in their sad bereavement. And also to those who contributed so many beautiful flow- ers.

Geo. Matthews, Ltd.

#### ANNUAL MEETING OF UNION SUNDAY SCHOOL

The annual meeting of the teachers and officers of the Union Sunday School was held at the Manse on Monday evening. The report of the year's work as presented by the secretary-treasurer, Mr. McCorkle was evidence of a splendid year's work.

The average attendance per Sunday day for the year was one hundred and eight, while the offerings averaged six dollars and seventeen cents per Sunday. To missions and benevolence the school contributed sixty-two dollars.

A few adjustments were made to teachers and classes, and Mr. Sutton was appointed assistant superintendent, Miss Jean McMillan pianist and Mr. R. A. Brown choir leader. The staff of the school are anxious to make the school as useful as possible and any child not attending any Sunday school is cordially asked to be present next Sunday.

## Prospects Are Bright

As the year draws to a close, and annual statements and reports of all kinds are in course of preparation, it is beginning to be understood that conditions throughout Canada have greatly improved during the twelve months, and further that all present indications point to this general betterment being maintained and increased during 1925.

Probably the most important factor leading to this improvement are the higher prices now prevailing for grain, and which are on a much higher level than a year ago. While the aggregate yield is considerably smaller than last year, the value of the 1924 crop is estimated to be approximately \$100,000,000 greater, and the cost of harvesting, threshing and marketing has been lower. The net result is a substantial increase in the amount of money realized by the farmers, although, unfortunately, it is not as evenly distributed through all districts of the West as might be desired.

The effect, however, is seen in a marked reduction in old outstanding liabilities. Scores of municipalities are reporting the wiping off of long overdue tax arrears and the cleaning up of the municipal balance sheet. Banks, mortgage and loan companies report the same good news, namely, the wiping out of old debts. Slowly, perhaps, but surely, all this money finds its way back into investment and productive channels. Capital is never allowed to long remain idle, but is put to work again as quickly as possible, and all the more rapidly when there is a general renewal of confidence and a feeling of hopefulness throughout the country.

Recent reports of trade activities reveal larger sales in many retail lines, showing that, in addition to liquidating old indebtedness, farmers are finding themselves in a position to now make purchases of needed articles but which they had to struggle along without during the past few years. As accumulated stocks of goods held by merchants are thus disposed of, and replenishment becomes necessary, a revival in industry will follow and unemployment decrease. Such a development is anticipated in all quarters during the coming year.

Further evidence of the general improvement taking place throughout Canada is found in the reports of the Department of Trade and Commerce. These reveal a steady increase in the volume and value of exports of Canadian products over imports from other countries. The adverse balance of trade of a few years ago has been overcome until now Canada's exports exceed its imports by over \$200,000,000. In other words, Canadians sold over \$100,000,000 more of products to other countries this year than one year ago and bought nearly \$100,000,000 less.

Slowly but surely conditions are becoming more settled in Europe and throughout the world, and, as has all along been contended in the articles appearing in this column, it is only through a restoration of the buying power of foreign countries impoverished by the war, and a consequent demand for those products which Canada can supply on a large scale, and for which we must have foreign export markets, that prosperity can be established in this Dominion. Canada produces far more than it can itself consume, and if foreign markets are unable to absorb and pay good prices for our surplus there must inevitably be stagnation and depression here.

It is especially gratifying, therefore, to learn that during the year Canada's exports to China virtually doubled; to Germany they nearly double; to Japan they increased by \$9,000,000; while to all parts of the British Empire they increased by over \$32,000,000 and by over \$7,000,000 to the United States. On the other hand, Canada bought \$86,000,000 less from the United States, thus improving our trade balance with our neighbors to the south to the extent of \$62,000,000 in one year.

Those most conversant with international trade and commerce, and who are well informed on the trend of conditions the world over, hold the view that this betterment during the latter half of 1924 will continue well into the new year, and that, as a result, the outlook is most promising for a continuance of good prices, increased industrial and commercial activity, and a consequent lessening of unemployment.

A general agricultural, commercial and industrial betterment is bound to have a beneficial effect on the building trades, and forecasts appearing in trade journals throughout the country are favorable to a heavier building programme than for some years past.

From a purely Canadian standpoint, and especially from a Western standpoint, additional encouragement is to be found in the fact that in all quarters it is anticipated that 1925 will prove to be a record year in immigration to this country. And let it be remembered that the most prosperous era in Canada's history was during those years when immigration was in full tide towards Canada's shores.

Let Canadians continue to hang on and work unremittingly during the next few years, as they have done for the past few years in the face of many difficulties and discouragements, and they will reap the reward of the better times which are undoubtedly ahead.

## Seeds Sprout After 100 Years

Michigan Agricultural College Hopes to Mature Water Lily Plants

Two century-old water lily seeds have sprouted at Michigan Agricultural College, to establish a world's record for the length of time that seeds of this class have lain and still possess life. Dr. E. A. Bessel, head of the M. A. C. botany department, said: The seeds were obtained from a Manchurian peat bed. It is hoped to place the mature plants of the water lily in the famous botanical gardens of the college.

## Prominent Business Man Dies

Fred Ardial Fitzgerald, organizer of the Imperial Oil Company in Canada, and president and general manager of that concern from the time of its incorporation until it was sold to the Standard Oil Company, died recently at London, Ont., aged 85.

Many a man who is sentimental about the old swimming hole that was three miles from town, complains bitterly if the bathroom is at the end of the hall.

## Unchecked Accidents

Alarming Number of Deaths Caused By Automobiles

Automobiles and motor trucks caused the deaths of 225 persons in New York State during November. Eighty of the deaths were in New York City. Five automobile passengers were killed at railroad crossings at different places in the state and five deaths were caused by trolley cars. Why talk about international disarmament when such internal slaughter goes on hardly checked!—Buffalo Express.

## Church Union Soon

According to a proclamation in the Saskatchewan Gazette, the United Church of Canada Act, passed with various amendments at the last session of the legislature, and held in abeyance pending an official proclamation making it operative, is to come into force June 10, 1925, except section 8, which will come into force Dec. 10.

Some try to do something and be somebody, and some try to do something and be something.

## This Is Tact

Albert.—Father, what is tact?

Father.—Tact, my son, is what prevents a gray-haired man with a wrinkled face from reminding a youthful-looking woman with the complexion of a rose that they were boy and girl together.—Edinburgh Scotsman.

## City Is Washed

An earth tremor in Johannesburg upset a big vat in a soap factory.

The factory was flooded to a depth of three feet with boiling soap, which ran down suburban streets for three-quarters of a mile.

Arabian women go to war with their men, but they do not fight and are not permitted to share in the plunder. Neither may they be slain except by accident.

Between 500 and 1,000 lepers are believed to be at large in the United States.

Think about your own faults and you will talk less about the faults of others.

## Children Cry for Fletcher's CASTORIA

MOTHER.—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulence, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *Chas. Fletcher*. *Castoria* is absolutely harmless—no opium. Physicians everywhere recommend it.

## Manufacturers See Canada's Possibilities

## British Firms Taking Steps to Better Trade Relations

"Canada will be represented at Wembley Exhibition next year, just as strongly as she was this year," stated Lieut.-Col. Moore Cosgrave, D.S.O., Canadian Government trade commissioner at Shanghai, China.

Col. Cosgrave, who was a Dominion trade commissioner at Wembley, said that the exhibition had done more than anything else, in the history of the country, to put Canada permanently on the map as far as British manufacturers were concerned, and that many British firms in consequence were now taking active steps to better their trade relations with the Dominion.

Col. Cosgrave predicted that the Orient will become one of the chief markets for Canada's products, especially flour, electrical equipment, and timber from the Pacific coast.

## Confusion Over Balkan Boundaries

## Will Take Several Years to Straighten Matters Out

The confusion of the frontiers of the Balkans and Central Europe, as an outcome of the war, has not been settled by any means, although little is heard of the doubtful state of affairs outside of the immediate regions affected.

New boundary lines have been run through towns and villages in various countries and even across the farms of peasants themselves. In many instances it is reported that the individuals whose property is concerned do not know to this day to which state they should pay taxes. Estimates have been made by investigators that it will require ten years or even longer to get the boundary lines straightened out, and conditions amicably settled for many thousands of persons.

## Taxicabs Astonish Priests

## Lamas From Tibet Impressed By Number in London

When seven Lamas arrived in London from Tibet they exclaimed simultaneously and rapturously: "Dhe lungba repe." This was not priestly incantation, but merely Tibetan for "So this is London." The seven Lamas are said to be the first Tibetan priests to visit Europe. According to their interpreter, the priests were impressed most by the multitude of taxicabs, which they declared to be the most wonderful things they have seen in their travels. The monastery of these Lamas is on the slope of Mount Everest.

## Needs More Revenue

## Ontario Will Have to Find New Sources of Taxation

Intimation that the province of Ontario will have to find a new source of revenue so that too heavy a burden of taxation may not descend upon future generations, was made by Hon. W. F. Nickel, attorney-general of Ontario, in an address at Toronto.

Mr. Nickel said that any such course would bear as lightly as possible on the people, but that it was not fair for the men and women of today to pass on to generations yet unborn to pass on to generations yet unborn the current revenue of the province.

## Noted Novelist Going Blind

## Thought Has Inspired Rather Than Depressed Basil King

On the verge of total blindness, Basil King, the Canadian novelist, is far from being depressed. Complete darkness, which he admits will soon be his fate, inspires him, instead of weighing him down.

He was smiling and happy as he waited for the Mauretanian to take him on his way to Spain, where he will spend the winter in search of literary material.

## This Is Tact

Father.—Father, what is tact?

Father.—Tact, my son, is what prevents a gray-haired man with a wrinkled face from reminding a youthful-looking woman with the complexion of a rose that they were boy and girl together.—Edinburgh Scotsman.

## Scientists Going Around World

A seagoing vessel, equipped with scientific instruments and paraphernalia, is to be built for the German Society for the Knowledge of Foreign Countries. German scientists and scholars will make the ship their home, travel around the world, and perform research work.

Telephone calls are numbered as they reach the exchanges in France. If a subscriber loses his temper and rattles the receiver-hook, his turn is placed at the end of the line.

Egypt's largest pyramid, that of Cheops of the Zieh group, contains 89,000,000 cubic feet of masonry, and the total weight of the stones has been estimated at more than 6,000,000 tons.

## COLOR IT NEW WITH

## "DIAMOND DYES"

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waist, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

## Safety At Rail Crossings

## A Good Rule For the Safety of Motorists

When approaching a grade crossing bring the automobile to a stop, then look in both directions, listening intently for the sound of an approaching train. If you have made sure there is no train approaching from either direction, proceed to cross the track—in low or second gear is the best way. To some people this instruction may seem absurd, but it may be said the 9,000 persons who have lost their lives at grade crossings did not stop to ascertain whether or not a train was approaching before proceeding to cross the tracks.

## Japan Unduly Agitated

## Visit of U.S. Fleet to Australia No Cause for Alarm

Commenting on the agitation in Tokio over the visit of the United States battle fleet to Australia, the Melbourne Argus says Japan has no more ground for objection than the United States would have in the case of Japanese fleet going to Melboure.

The United States visit will be regarded by people of average perception as a guarantee of peace than a menace of war, the paper adds and the fleet is sure of a cordial welcome.

An excellent protection against worms can be got in Miller's Worm Powders. They render the stomach and intestines untenable to them. They heal the surfaces that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and that their operation is altogether health-giving.

## Nationalized Russia

## Country in Deplorable State Under Bolshevik Rule

After seven years of nationalization, Russia has a deficit of 400,000,000 rubles on a reduced budget, her school teachers are dying of hunger, half her villages are without shops, and her workmen are reduced to 40 per cent. of their pre-war numbers. All this we know on the authority of Mr. Rykoff, Lenin's successor, who told it to his Communist conference last May.—London Times.

## New Remedy For Pneumonia

## Alleged Cure Will Be Demonstrated By Paris Doctor

Dr. D. E. Gerin is in New York to demonstrate under the auspices of New York State physicians' organizations a method by which he says he has brought about cures in more than 600 pneumonia cases, with no deaths to mar the record.

He also intends to demonstrate a method of treating pernicious anemia without blood transfusions. The tests, to be conducted in the hospitals of New York, will occupy four months. Dr. Gerin was born of French parents in Nashua, N.H., in 1867. For some years he was a leader in the French colony of San Francisco.

## Extending Northern Railway

Another chapter was written in the history of railway development in the north, when the first train to pass over the E. D. and B. C. extension from Berwyn to Whitelaw, made its initial trip. A twice weekly service will from henceforth be in operation over this branch, serving the needs of districts beyond the town of Berwyn.

## Both Work and Play

Princeton University professors see in the crossword puzzle a powerful aid to college effort. This is merely a verification of an old theory, namely, that in order to make work attractive it must be made part play.—Detroit Free Press.

## The Mittus

The Mittus, an agricultural tribe living on the upper Nile, are the most musical of savage races.

## Keep Minard's Liniment in the House

W. N. U. 1555

## Credit For German Railways

## New York Syndicate Loaning Private-Managed Roads \$10,000,000

German railways, state-owned but under the Dawes plan, privately-managed, are to get \$10,000,000 credit from a New York banking syndicate and \$5,000,000 in London. It is another evidence that, under the new regime, Germany can be financed on sound principles.

The German state railways comprise what is probably the largest system in the world, with 33,000 miles of line. Like nearly all state-owned railways, rolling stock is new (public railway officials appear to buy locomotives by the gross), and of modern types. The total capitalization of the railways is about \$5,500,000,000. The lines are estimated to be worth in excess of \$6,000,000,000. So there is ample security for the credit so long as the Dawes plan prevents further political troubles.—Buffalo Express.

## Sweden Establishes Freight Air Service

## Goods Delivered 240 Miles Distant In Three Hours

A regular commercial express and freight service by air to neighboring countries is the latest development in the use of airplanes. The freight service has actually started over the line between Stockholm and Helsingfors, Finland, and thus augments the air traffic between those two countries, which has hitherto been limited to passengers and mails. The distance to Helsingfors is about 240 miles across the Baltic Sea, a good day's run for a small steamer. The peculiar utility of air shipping was demonstrated by the fact that the first cargo carried half a ton of medical supplies which were delivered in Helsingfors three hours after being taken on board.

Be sure to inoculate the seed. This is important. Alfalfa culture for inoculation can be procured from the Manitoba Agricultural College (Bacteriology Department) at a very small cost and is absolutely necessary for a good stand. Do not attempt to grow alfalfa either on slough or land where water frequently lies for considerable time as it will partially, if not wholly, be killed out after the water disappears.

Alfalfa will grow well on sands, loams or clay.

It is more a question of cultivation than soil, as land must be thoroughly worked up, giving it a final weed-killing, harrowing right before seeding.

Generally, wheat land will make excellent alfalfa soil, unless it happens to be underlaid with hard pan.

Summerfallow is the ideal land, or land on which cultivated, plowed or hoed crops have been grown.

Alfalfa may be seeded as early as the small grains with very little danger of damage or frost.

Early spring seeding has the advantage of getting such a start as to better hold its own against weeds, and is certain to become well established before winter.

There is no fixed time at which it may be said alfalfa should be seeded, but it is probable that better results will be obtained by seeding early, before weeds have started, or by giving the land one or more cultivations before seeding.

It is not advisable to seed the alfalfa unless the soil contains sufficient moisture to insure prompt germination. The seed is much better off in the sack than in dry soil.

Alfalfa can either be sown alone or with a nurse crop. Any of the small grains may be used satisfactorily as a nurse crop, but Marquis wheat has given us the best results as it grows less foliage and is less likely to lodge than any of the other grains. Being early, it gives the alfalfa a longer time to grow before frost after the wheat is harvested. One-fourth to one-half less seed should be sown as a nurse crop. We have had the best results, however, by preparing the land carefully, manuring and sowing the alfalfa alone.

(To be continued)

## Conditions Are Essentially Sound

With the closing of one year and the incoming of a new year it is customary for business institutions and individuals to take stock of their present position and ascertain whether progress has been recorded, whether assets or liabilities have increased, and generally, whether their position is stronger or weaker than at the beginning of the twelve-month period. It is not only natural that this stocktaking should be done, but it is eminently wise. But it is to be of full value, it must be searching in character and absolutely honest. No camouflage should be tolerated.

In last week's article in this column, a forward look was attempted and the conclusion reached that prospects in Canada were bright for improvement during 1925, providing the people of Canada displayed continued confidence in themselves and the resources of their country, and threw themselves with unremitting energy into the task of developing those resources for their own use and to supply foreign markets. Later reports from all quarters serve to strengthen this view.

In order, however, to obtain a true conception of present-day conditions, it is necessary to look back over a longer period than one year. Just six years have elapsed since the World War ended, and the titanic conflict which turned the world upside down for nearly five years ended in victory for the Allies. During those years of tremendous destruction of life and property the pendulum swung to the extreme in one direction. During the last six years it has swung to the extreme in the other direction, as was inevitable. It is now gradually getting back to normal.

When one stops to consider the world situation at the close of 1918 with millions of men still under arms, to be transported to their homes, demobilized and absorbed into the occupations of civilian life; with the world's whole industrial organization to be converted from the business of war to the arts and sciences of peace; with inflated values for commodities of all kinds to be restored to normal levels; with all the destruction of war to be made good, and all the aftermath of war to be cleaned up, it is little short of marvellous that so much has been accomplished and conditions are as satisfactory as they now are, six years later.

It could not be otherwise than that there should be periods of discouragement and depression, unemployment and hard times, with their accompaniment of distress, suffering and loss during this time of reconstruction and readjustment. But the marvel is not that full recovery has not been more quickly achieved, but that so much has been accomplished without greater unrest, more prolonged depression, and more severe losses.

Instead of the people of Canada feeling discouraged and despondent because of conditions as they exist today, they should rather be encouraged and profoundly thankful, and filled with confidence for the future solidly based on the really wonderful recovery of the past few years.

These years of adversity, trying and difficult as they have been, have not been without value. In the long run those who have displayed courage and tenacity, fought their economic battles and hung grimly on, will reap their reward, and Canada will be the better for the struggle through which it has, and still is, passing.

Recent years have proven that these Western Provinces are capable of producing great crops. Some districts may be adversely affected one year, and other districts in other years. But the country as a whole is sound and capable of producing enormous wealth, and with a resumption of normal world conditions—and this normally becomes more evident with each passing year—there is no cause for pessimism nor doubt as to the future.

Methods and conditions are, and must, constantly be changing, and our people must accept and meet these. For example, not so many years ago Western Canada was a butter importing country; today it exports millions of pounds of butter annually. Western Canada used to import turkeys for Thanksgiving and Christmas; now it exports them by the carload to Eastern and United States markets.

Immigration, which came to a stop during the war and was limited for some years by after-war conditions, is rapidly rising, and with the stringent "quota" restrictions now imposed by the United States, the tide is turning towards this Dominion, so that we may expect an ever-increasing influx of new population and new wealth.

Instead of talking hard times and depression, Canadians at the opening of the New Year should, after taking a backward glance, turn their faces forward with hope and confidence. Compared with most countries, Canada is indeed fortunate and blessed. Its people can, if they will, carry it and themselves a long way onward on the road to good times and an all-round satisfactory degree of development and prosperity.

## Women Lawyers Forge Ahead

## One Wins Case in English Court Of Criminal Appeal

Women barristers as counsel in court cases are forging ahead in this country. Miss Ida Duncan has just won a case in the court of criminal appeal, where she appeared as counsel for two men who had been convicted of housebreaking. Then court of appeal quashed the convictions. Miss Hesling was counsel for an erring wife in divorce proceedings in a Manchester court, but she was not so fortunate as her sister barrister, Miss Duncan, as she did not succeed in her case.

## Progress of Elevator Company

In the thirteen years which the Saskatchewan Co-operative Elevator Company has been in business it has handled 337,554,000 bushels of grain. In 1911-12 the holdings were 3,262,000; in 1913-14 they were 48,445,000 bushels. In the thirteen years the company has constructed 435 elevators, 52 having been erected in the present year.

All Right, Then  
Guard (to prisoner, a former lumber agent).—Yes, you are condemned to death. Have you any last wish?

Prisoner.—It would delight me if my firm were allowed to furnish the gallows.—Sandors-Nisse (Stockholm).

## Versatile

Mistress.—Can you serve company? New Maid.—Yes; either way.

"Either way?"

"Yes, ma'am; so's they'll come again or so they won't."

The average life of a railway locomotive is 38 years.

## Frost Bites

Minard's takes the sting out of them. Quicksilver circulation and prevents complications.

## Will Not Answer Summons

Vincente Blasco Ibanez Prefers to Remain in France

Vincente Blasco Ibanez, the Spanish author who recently from Paris has been attacking the King and the Government of Spain in pamphlets which were scattered in various parts of Spain by airplanes, has been summoned to appear before a military judge in Madrid to answer charges made against him. Ibanez laughed heartily when informed of the effect, according to the Paris dispatches.

"It is unnecessary to say that I shall not respond to the invitation," he said. "I would just as soon take refuge on a cannibal island or throw myself into waters inhabited by hungry crocodiles or famished sharks, as to confide myself to the government of bandits now ruling Spain.

"I suppose they will confiscate everything I possess in Spain, but let them, and welcome. The time is coming when a regular constitutional government will be established in Madrid, then I shall go there to face anyone who has charges to make against me. In the meantime I shall remain in France and continue agitation for the regeneration of my country.

Growth Of Armaments  
Made War Inevitable

World Needs Something That Was Lacking in 1914

Viscount Grey, speaking at Newcastle under the auspices of the League of Nations Union, said that future wars could only be avoided by having something they had not got in 1914. Looking back and reflecting, the speaker saw now what he did not see in 1914—that war was inevitable owing to the growth of armaments. "We cannot afford," he proceeded, "to have another war. If war was inevitable in 1914 because of something we did not possess, then let us make it impossible in the future by possessing it."

The League of Nations, Viscount Grey added, was the thing that was lacking in 1914.

## Anxious to Visit Ranch in Alberta

Princess Mary Wishes to Make Canadian Trip Informally

There is a strong possibility that Princess Mary and Viscount Lascelles may pay an unofficial visit to Canada in the not very far distant future. It is understood that the Princess has for some time been anxious to visit the western ranch owned by her brother, the Prince of Wales. A royal visit is not an easy matter to arrange or carry through, but Her Royal Highness, it is understood, wishes to make the trip quite informally in much the same fashion as the last visit to the Dominion of the Prince himself. It is probable that an opportunity will be given to the Princess to see her brother's Canadian home, as the Prince is anxious she should do. The Duke and Duchess of York, who have gone to South Africa have also expressed a desire to visit Canada and will probably be able to gratify it within a year or two.

Scientist Performs  
Wonderful Operation

Transplants Living Heart From One Salamander to Another

A living, beating heart has at last been transplanted from one living body to another.

Dr. Stohr, of Wurzburg, Bavaria, is the scientist who has accomplished this feat. The experiment was performed on two embryo salamanders. Dr. Stohr not only transplanting the heart from one to another, but also succeeding in keeping both organs alive and functioning in the same body for some time.

"Man, you've had a mighty narrow escape. Ye can only thank Providence that ye weren't killed."

"Aye," said the other, "but ye maun alloo I wis kin' o' nimble masel!"

Gets Lifesaving Medal

The Humane Society Council has decided to award a lifesaving medal to C. Merrick, a Regina boy, who saved a smaller boy from drowning in the Rideau River last summer while visiting Ottawa relatives of his while on holidays.

Profitable Chicken

A resident of Mildmay, Ont., purchased a dressed chicken from a local merchant for 80 cents, and when preparing the bird for the roasting pan found a \$1 gold artificial tooth in the crop.

Brought Up Wrong

Teacher: "Why, Willie! Such dirty hands! Who brought you up?" Willie: "De coal man, in his wagon, ma'am."

Economic Discovery

The milk business in this country is better than the beer business used to be, but it is harder to get cow milkers than bartenders.—Dallas News.

## U. S. Fleet To Visit Australia

May Have Effect On British Shipbuilding Is Opinion

The news that practically the whole of the United States scouting cruiser squadron, consisting entirely of ships of the new 7,700-ton type, is going to visit Australia early in the new year, may have more effect on British shipbuilding than appears likely at first sight.

It will be remembered, however, that this visit made the Australians think seriously of naval defence, and led to the construction of the Australian and New Zealand, as well as the smaller cruisers of the Sydney type. It may very well be that a visit carried out by the scouting cruiser squadron, six or eight brand new vessels of the highest speed, capable of going all over the world, and especially adapted for corsair work and cutting communications, will have a similar effect.

Liverpool Journal of Commerce.

## PAINS IN THE JOINTS

Is An Indication That The Blood Is Thin and Watery

The first sign of rheumatism is frequently a pain and swelling of one of the joints. If this is not treated through the blood, which is the seat of the disease, the poison spreads, affecting other joints and tissues—sometimes rheumatism attacks the heart and is fatal.

A remedy that has corrected many cases of rheumatism is Dr. Williams' Pink Pills. These pills enrich and purify the blood so that the poisonous rheumatic matter is driven out of the system as nature intended. Miss Gertrude Denne, Washago, Ont., was attacked with rheumatism and found relief through Dr. Williams' Pink Pills. She says: "About a year ago I was attacked by rheumatism and for two weeks was confined to my bed. The trouble was so painful, affecting the joints of my limbs, so that I could not stand alone. Mother had a box of Dr. Williams' Pink Pills in the house and thought they might help me. I began taking them, and when I had taken these pills got a further supply, with the result that the rheumatism vanished and I was a well girl. I may add that my mother and two of my sisters have also used the pills for various ailments with equal success, and now we are never without them in the house."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Britain Gets Valuable Order

Electrical Company Secures Contract From Sydney Suburban Railway

The Metropolitan-Vickers Electrical Company, Ltd., of Trafford Park, Manchester, have secured a contract for the electrical equipment for the Sydney, New South Wales, Suburban Railway's electrification.

The order amounts to nearly \$2,500,000. The company won it in spite of keen competition from America and other quarters.

Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are non-injurious in their composition, and while in some cases they may cause vomiting, that must not be taken as a sign that they are nauseating, but as an indication of their effective work.

## B.C. Exports Railway Ties

It is stated that an order for 1,500,000 feet of ties for the Sudan has been placed with small B.C. mills outside the association in the province for January-February delivery. Great Britain has been seeking to place an order for 30,000,000 feet of ties and it is now reported fixed. British Columbia mills were able to take 9,000,000 feet.

The first metal nut to practical use was copper, made into knives and other implements 6,000 years ago.

## WALKED THE FLOOR FOR HOURS

NERVES WERE SO BAD

Wherever there are people who are troubled with deranged nerves they will find in Milburn's Heart and Nerve Pills, a remedy that will restore the equilibrium of these deranged centres and bring back the shattered nervous system to a perfect condition.

Mrs. W. W. Athlone, Woodrourne, Ont., writes: "After having a severe attack of bronchitis I was left in a very weak, run-down condition; my nerves were all broken up; could not sleep at night, and would have to get up and walk the floor for hours. After using box of

MILBURN'S  
HEART AND NERVE PILLS

I began to feel much better, and after taking a few more boxes I could rest my rest as well as I ever did. I always recommend them to all my friends."

For sale at all druggists and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Land and to Spare

Of the 300 million acres in Canada fit for farming, one-third is in farm holding; only one-sixth is cultivated; and 250 million acres await the plow.

The first newspaper advertisement offered a reward for the return of a lost horse in London.

Fafau, only 400 miles from Australia, is overrun by cannibals.

## Will Not Conclude Treaty

Britain Will Not Sign Pact While Russia Continues Propaganda

Great Britain, under the Conservative Government, will refuse to conclude any treaty with Russia so long as the Soviet Union continues its propaganda in the British Empire. That is the dictum laid down by Sir William Joynson-Hicks, home minister.

Replying to criticism from Laborites in the House of Commons on the authenticity of the now famous Zimmerman letter, the home minister declared:

"The cabinet has satisfied itself as to the genuineness of the letter. The Laborites ask us to accept the Russian treaty terms to prevent an outbreak of Communism in Britain. If Russia wants to befriend us, let her begin by halting her world-wide propaganda. Let her cease propagandizing in Egypt, India and throughout the Empire, in trying to raise rebellion against us. There will be no treaty with Russia so long as she continues her propaganda."

## INVENTORS

Before disclosing your invention to anyone, send for Free "RECORD OF INVENTION," New Leaflet "PATENTS—A Road to Fortune"; also free on request. Prompt, personal service. W. IRWIN HASKETT, Hope Bldg., 10 Elgin St., Ottawa, Ont.

"Next door to the Canadian Patent Office."

Vegetation in the Carolinian Zone In Southwestern Ontario

Few persons have the opportunity or the time to study Canada as this country deserves. Visitors have been heard to say they did not know we had such universally favorable weather conditions or such a variety of climate; even our own people are largely unfamiliar with many of its most interesting features.

For instance, in Southwestern Ontario, south of a line running from Toronto to Goderich we have what is known as the Carolinian zone, so-called on account of the similarity of the vegetation with that of the Southern Atlantic States.

In this area are many farms of vegetation that occur nowhere else in Canada. It is known as the fruit belt, and it is fully settled and intensively farmed. The few remaining trees are

such as sycamore, chestnut, black walnut and certain species of oak and hickory.

Among the plants which are peculiar to certain localities in this area are sassafras, red mulberry, tulip trees, flowering dogwood and others.

There are over 100 varieties of heraceous vegetation growing in this Carolinian zone that grow nowhere else in Canada, but many of these are now practically eradicated by cultivation.

It is interesting to note that Pelee Island, the most southerly point of Canada, is 123 miles south of the latitude of Toronto.

The Natural Resources Intelligence Service of the Department of the Interior has a very interesting vegetation and forest cover map, which may be had on application to the director.

Free Paint Book For the Children

Every Child Will Want a Copy of "Tommy Tompkins Painting Book"

Xmas is not far off. Oxo Limited this year again are helping mothers reduce the cost of filling Xmas stockings by offering a very attractive little painting book, entitled "Tommy Tompkins Painting Book," in return for four Oxo Cube wrappers. It is filled with pictures showing how Tommy won a long distance race; how he won at cricket, football, boxing, wrestling; what he did when his automobile broke down in a big race and how he succeeded in keeping at the head of his class in school, etc., etc. To secure this painting book you need only buy a small tin of four Oxo Cubes, the outside being very small, and as Oxo Cubes are really daily necessities in the home your interest in this offer will reward you in two ways. The Mighty Atoms are always ready for making beef tea and consomme and to put flavor and meat strength into soups, stews, hash, and meat pies. Ask any grocer, every store of course carries them, and mail the wrappers to Tommy Tompkins, Oxo Limited, 232 Lemont St., Montreal, P.Q., and your copy will be forwarded by return in time for placing in the Xmas stocking.

Alberta Captures Prizes

Scores Heavily in the Timothy and Alfalfa Seed Class at Chicago

Canadian exhibitors at the International Hay and Grain Show at Chicago scored heavily in the timothy and alfalfa seed classes. In the alfalfa seed competition, Nick Chjelta, of Brooks, Alberta, won first place from Idaho planters, while 10th, 13th, 14th and 15th places also went to Alberta farmers. In timothy, first honors went to a Montana farmer, but the next two awards went to A. Hochstein, of Pincher Creek, Alberta, and Robert Cochrane,

## Grand Subscription Campaign \$50,000 MORE OR LESS

## IN CASH PRIZES Free to Subscribers

## A COMPETITION OF SKILL

How many words in the English language can you make from the words—

## "JACK CANUCK, TORONTO"

No proper names are to be used. Webster's English dictionary will decide. In the event of ties, prizes will be divided pro rata.

## YOUR SKILL MAY WIN YOU A FORTUNE

With your help we are going to make Jack Canuck the greatest of all Canadian magazines, a magazine fearless in criticism, untrammeled by the big interests, devoted to the common people.

## OUR OBJECTIVE IS 100,000 NEW SUBSCRIBERS

Cut out the form below, fill in your name and address, attach it to your list of words, enclose the regular subscription price of \$3.50 per annum and mail it to Circulation Department, Jack Canuck Publishing Co. Limited, 319 Bay Street, Toronto, and your little investment may make you a fortune.

Mark your envelope "Cash Prizes."

The amount of money to be divided will be based on the number of subscribers received, in the proportion of 50 cents for each new subscription received. Thus, if the objective of 100,000 new subscribers is reached, the amount will be \$50,000, divided as follows:

To the first subscriber sending in largest correct list	\$20,000.00
" second	10,000.00
" third	5,000.00
" fourth	3,000.00
" fifth	2,000.00
" sixth	1,000.00
" seventh	500.00
" eighth	300.00
" ninth	200.00
Eighty prizes of \$100 each.....	8,000.00
Total .....	850,000.00

EIGHTY-NINE PRIZES 89 EIGHTY-NINE

Competition closes on the first day of March, 1925 at 12 o'clock p.m. Rush your entry and get a place among the big winners.

Circulation Department, Jack Canuck, 319 Bay Street, Toronto.

## THE SMALL TOWN AT A PREMIUM

No longer will they poke fun at the small town, for it is coming into its own. Small towns can rejoice at every increase in population of the big town, because with such increase comes a pushing out of its population onto the smaller communities, and especially is the lesson driven home that the small town is ideal for free breathing and for clean, happy and joyous living. The reason is plain—congested cities are not as desirable for homes as suburban localities, unless one is able to own a home along millionaire row. Smokestacks and tall buildings make for efficiency but not necessarily for virtue.

The day will come—is coming, has come—when the smaller town can provide for the needs of citizenship as well or better than the great city. It has great open spaces while the city has not. Its schools and churches are more accessible just as efficient, and are without the distractions common to more populous areas. Greatest of them all, the small town provides opportunity for friendship, for knowing and meeting and greeting the other fellow, that will always remain an unchallenged asset over that of the city. It is the eternal struggle of quality over quantity.

## WORK

Without work no amount of talent, no amount of influence, will carry a man very far in this world. One is amazed at the point of view of some modern young men. They look at the successful men of the day as if they supposed success to be an easy matter—giving rich gifts and requiring little in return. One wonders what they would think if they could see the average day's program of one of the men they envy. Theodore Roosevelt left a correspondence that of itself involved more work than the average man does in his active life. Yet it represented only a small part of his activities. The higher men climb, the longer their working day. And any young man with a streak of idleness in him might better wake up his mind at the beginning that mediocrity is to be his lot. Without immense, sustained effort he will not climb high. And even though fortune or chance were to lift him high he would not stay there. There are no office hours for the leaders.

## THE ADVERTISER GIVES BETTER VALUES AND BETTER MERCHANDISE

Advertising and turnover. These two go together in good store management. And turnover may be defined as a policy of merchandising which says, "sell at a small profit, and carry as little merchandise over from year to year as possible." This policy spells success for the merchant because it creates hundreds of satisfied customers.

The merchant who follows it, advertises steadily. He must use advertising to move his merchandise off his shelves. And to get results from his advertising, he must offer the public better values and better lines of goods. Thus the policy of advertising and getting rapid turnover benefits you, the buyer in two ways.

It means lower prices.

It means more seasonable merchandise. You are not sold stuff that has been hanging around on shelves from the year before.

This makes it look as though there is no common sense back of the old idea that the advertiser puts the cost of his advertising in the price of the merchandise he sells.

The merchant who does not advertise really has to charge more. He has his money tied up in old merchandise when he needs it to buy new stocks. He suffers a real loss in carrying old stuff over from year to year, and this loss has to be made up by the public. So patronize the merchant who advertises. It pays.

## STATIC TURNED TO USE...

It seems that almost everything has its uses. Static, that burglar of all radio fans, has now been put to work, and is proving of real value to aviators, who are using it in the warmer climates to detect brewing thunderstorms and follow their movements. They tune in on the static to its maximum intensity and by changing their loop secure the location of the storm and the direction it is going, together with its speed. Not only for aviators but for seafarers is this use of static and the radio of exceptional value.

Cheap alarm clocks are the best. Sometimes they don't go off.

What this country needs is shoe strings that last as long as the shoes.

## Here and There

A recent survey of prospective expansion among the mines of North Ontario shows that many millions of dollars will be spent on mills and mill supplies in 1925. According to this survey, mill expenditures totalling \$7,350,000 are contemplated.

Hunters patronizing territories in the Algoma district of the Canadian Pacific Railway had a very successful season in 1924, according to a report recently issued. Moose numbering 178, deer numbering 2,183 and approximately 7,050 partridge were secured and the number of hunters ran into several thousand. The figures quoted include those for Kipawa, Temiskaming, Mattawa, Sturgeon Falls, Pakesley, Sault Ste. Marie, Chapleau, Sudbury, Schreiber and Nipigon, all exceptionally good game areas.

More Christmas trees were shipped from Nova Scotia for the 1924 festive season than ever before, according to figures just compiled. Twenty-two car-loads from territory bordering the Dominion Atlantic Railway alone were shipped to outside points and approximately 150 car-loads left the province generally.

A splendid season of winter sports is expected at Quebec this year, as more and more people are becoming interested in these healthy recreations in Canada and the United States. In connection with the activities of the Chateau Frontenac, the Canadian Pacific's great hotel in the Ancient Capital, a number of new features will add to the attractions Quebec has to offer. These include inter-club, inter-collegiate and international competitions in all winter sports, to be held under the auspices of the recently formed Frontenac Winter Sports Club, which will award the successful participants with trophies of various kinds and attractive gold, silver and bronze medals.

### WORLD HAPPENINGS BRIEFLY TOLD

Approximately 4,600 candidates contested for less than 50 seats in the Reichstag, in the recent election.

The estate of Sir Alfred A. Smithers, former chairman of the Grand Trunk Railway, who died August 22 last, has been probated at £40,000.

The executive council of the British Empire Exhibition unanimously approved of the decision to continue the exhibition in 1925.

Two air force officers were sentenced to death and shot for remaining inactive during the Communist outbreak at Reval, Estonia.

Anton Flettner, creator of the sailless wind-propelled "Rotor" ship, is being flooded with invitations to visit neighboring countries and explain his invention.

Creation of a trust fund of approximately \$40,000,000 for certain charitable and educational purposes has been announced at Charlotte, N.C., by James B. Duke, millionaire power magnate.

James Bayne, a negro laborer, who added to his earnings through his ability as a banjo player, was injured when his right hand was caught in the door of a Toronto street car, and a jury awarded him \$6,000 damages.

A parchment roll found in excellent condition in an old Tudor house at Barnard Castle, Durham, has proved, on examination by antiquaries, to have been inscribed in the reign of Edward I.

Lack of an adequate aircraft industry is a matter of grave concern to the United States Government, in the judgment of the National Advisory Committee for Aeronautics, as presented in its annual report to Congress by President Coolidge.

Reports from the present Franco-German commercial negotiations portend an attempt to form a vast European steel trust, including France, Germany, Great Britain, Belgium, Luxembourg and possibly Poland and Czechoslovakia.

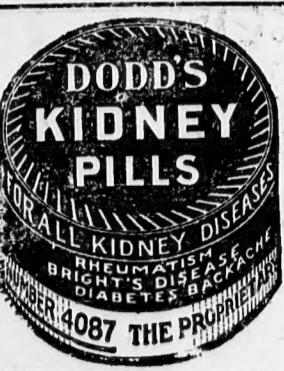

### Will Await Federal Action

Alberta Farm Loan Act is Stayed Pending Move at Ottawa.

The Alberta Farm Loan Act will continue inoperative, pending the action of the Dominion Government in regard to a general rural credits scheme for the whole of Canada. This is, as stated by Hon. R. G. Reid, provincial treasurer, in view of the discussion of rural credits at the recent tax conference in Ottawa. A federal act is likely to be introduced in the Dominion Parliament at the coming session.

In Korea, the sexes are rigidly separated even within the family circle. Before the Japanese came, and the new era began, a lady of rank in Korea was more carefully guarded than even Mohammedan woman of similar social position.

What is believed to be the skeleton of King Richard III, has been unearthed in Leicestershire and presented to the museum. The king was killed there in 1485 at the battle of Bosworth.

W. N. U. 1555

### Fears Revolt of Red Army

#### Soviets Now Trying to Force Assistance From French Government

The immediate fear of the Soviet leaders is that the Red army will revolt it not paid and fed. The last thing they worry about is buying food for the 10,000,000 to 20,000,000 in the Volga and Caucasus now facing famine.

An attempt to force Great Britain into giving Russia a loan by intensifying the revolutionary propaganda in India and Egypt and Mesopotamia was thwarted by the English elections. The Soviet relations with Italy are a farce. The only other country rich enough to give the Soviets credits is France.

From the Constantinople area, the Communist International sent Vladimirov Kolozov, skilled propaganda director, and 100 ordinary agitators to France and the French colonies. The "offensive" against the French Government is the last card in the Soviet hands, and if it fails Russia may fall into chaos before midwinter.

### MOST OLD FOLKS REQUIRE A HEART AND NERVE TONIC

After middle age little sickness and ailments seem harder to shake off than formerly as the heart action becomes weak and uncertain and the nerves are not as steady as they were in the younger days.

Now is the time when all aged people who wish to maintain their health and vigor and retain their energy unimpaired should use

### MILBURN'S HEART AND NERVE PILLS

Mrs. M. O'Connor, Whitelose, Ont., writes: "I have been troubled, most of my life, with shortness of breath, palpitation of the heart, and fainting spells. I was advised, by a friend, to try Milburn's H. & N. Pills, which I did, and at once found relief, and I have never had a really bad spell since. I am 80 years of age and always keep them in the house, and feel that with their help I will see many years yet. I always recommend them to anyone who is suffering from heart trouble."

For sale at all druggists and dealers.

### Branch Line Motion Endorsed

#### Unanimous Ascent Is Given in Saskatchewan Legislature

Unanimous assent was given in the Saskatchewan Legislature to the branch line resolution proposed by A. J. Hindle, Government, Willowbunch.

The resolution, adopted without amendment, reads as follows:

1. That the three-year programme should be adhered to in introducing legislation into the House of Commons to provide for the construction of further branch lines of the Canadian National Railways.

2. That the bills affecting Saskatchewan which were defeated by the senate last session should again be introduced in the next session.

3. That the action of the senate in rejecting such bills last session did constitute ample reason for the modification of the veto power of that body.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passageway and bring about a healthy condition. It always relieves and its continued use often has a permanent effect. Why not get this long-famous remedy to-day and commence its use? Inhaled as smoke or vapor it is equally effective.

### Arrival Of Bachelor Boat

#### Comprised 50 Per Cent. of First-class Passengers on Empress of Russia

Bride ships have been common on both the Atlantic and Pacific, but seldom does a bachelor boat come to port.

This distinction was accorded the Empress of Russia when she crossed the Pacific this trip, as in her first-class passenger list more than 50 per cent. of names were those of eligible bachelors, from handsome Dutch lad of 18 years who stood 7 feet 3 1/4 inches, to a dapper little Filipino.

#### Constantinople Invaded My Mice

Constantinople is being held up by an army of mice that is infesting the government buildings. Important legislative measures are being laid aside while white walls and means are devised to get rid of the rodents. Other parts of Constantinople also are suffering from an invasion of mice.

#### Antelope Increasing

Within the radius of 40 miles of Taber, Alta., it is estimated that 1,000 antelopes are now collected and they are reported to be eating the farmers' green feed, reserved for their cattle. The antelope was near extinction at one time, but under protective measures is coming back. Antelopes are also to be found in the Brooks district.

Mexico claims the world's largest tree, a huge cypress at Tule, in the state of Oaxaca. This tree measures 154 feet in circumference. The California big trees grow higher, however.

An English astronomer states that matter exists in some of the stars, so heavy that a teaspoonful weighs more than two ordinary men.

### Trade With Australia

#### Canadian Goods Entering Australia Far Exceeds Our Imports

Canadian goods entering Australia annually are nine times greater in volume than Australian goods entering Canada, according to J. M. Elder, the new commissioner for Australia to the United States.

Last year Australian trade was one-fourteenth of Canada's trade, he said. Australia had granted Canada reductions in 12 commodities and Canada had given reductions in 14 commodities in return. The Canadian commodities which would benefit most would be fish, gloves, machinery, newsprint, writing and typing papers, corsets, pipes and tubes, galoshes, sand shoes, chassis and vehicles.

On the basis of past business, the value of the preference granted by Australia to Canada on her products would amount to approximately \$250,000.

The most important concession by Australia, Mr. Elder said, was preference on newspaper to the extent of \$3 a ton, which, he thought, should result in Canada largely displacing the Scandinavian export. Canada's most important concession was the free admission of Australian currants and raisins.

"Canada," he said, "has taken half of our export in raisins and it is now expected that the Commonwealth will increase her export of currants to Canada by 50 per cent."

#### Lauds New York Buildings

#### But English Architect Does Not Want Skyscrapers in London

The newest New York skyscrapers are buildings of classic beauty, but they would not suit London, according to the view expressed by G. Topham Forrest, architect of the London County Council, who was in the United States studying town planning and building methods.

The new municipal building in New York is probably the finest architectural conception he had ever seen, he said, and he added that he went to America with the idea that skyscrapers were box-like factories. But now his opinion is that while some of the older buildings there are bare architecturally, the newer ones are modeled on classic lines and are really beautiful.

In London skyscrapers are not necessary, Mr. Forrest said, and would cause such congestion of traffic as to make their adoption impossible.

Night lighting has been brought to a high pitch of perfection in New York, Chicago and Washington, these cities being much lighter than London the official contended in his statement.

#### Woman Commanded Red Ship

#### Captain Disappeared to Escape Second Imprisonment by Soviets

When the Russian ship Tovarisch sailed from Port Talbot, Glamorganshire, recently, a woman captain, known as Comrad Dialechenko, stood on the quarter-deck in command of a crew of 60 men.

The original captain of the Tovarisch was released from prison in Russia to navigate the vessel. When it arrived at Port Talbot he disappeared, and all efforts on the part of Soviet agents to find him failed. Friends said he knew he would be forced to return to prison immediately upon his arrival in Russia, and that he seized the first opportunity to escape.

#### Canadian Design Selected

#### Drawing for Hardings Memorial Work Of Vancouver Artist

The design by Charles Marega, of Vancouver, B.C., was selected by the Kiwanis International Council, Chicago, for a memorial to President Harding to be erected at Vancouver. It was at Vancouver that President Harding made one of his last addresses of his Alaskan tour.

The monument will consist of a semi-circular seat before which will stand two female figures holding above a relief of President Harding, the shields of Canada and the United States and an olive branch.

#### Bans Telephones

Constant ringing of telephone bells disturbs office efficiency, according to Walter Brown, of London, toy manufacturer. Brown has entirely dispensed with telephones in his office and employs a large fleet of boys to carry messages to different parts of the city.

Out of 146 homicides, taken at random, only one person paid the death penalty according to a published report of the Metropolitan Life Insurance Company.

Mexico claims the world's largest tree, a huge cypress at Tule, in the state of Oaxaca. This tree measures 154 feet in circumference. The California big trees grow higher, however.

An English astronomer states that matter exists in some of the stars, so heavy that a teaspoonful weighs more than two ordinary men.

### Romance Of World War

#### German Flier Marries Sister Of War-time Fox

Two air pilots, a German and an American, fought a thrilling duel in the air over Dijon, France, during the World War. The German was captured after being wounded by bullets from the American's plane.

The German, Baron Hans von Ringhausen, came to Omaha to marry Mrs. Bertha M. Wendell, sister of the American, Charles E. Cummings, former air pilot of the Foreign Legion.

Mrs. Wendell nursed the Baron back to health while she was Red Cross nurse in the American prison camp. The Baron and his bride will make their home in Omaha, he having disposed of his holdings in Germany.

#### Motorists Should Be Efficient

#### Require As Severe a Test As Railroad Engineers

A locomotive engineer must serve a long apprenticeship before he is entrusted with the running of an engine; and unless his eyesight is good enough to stand severe tests he cannot hold a job as engineer. If such care is necessary in the case of a man who runs a locomotive on a track, should not equal care be taken to ensure fitness in the case of a man or woman who undertakes to drive a motor car along crowded thoroughfares where it is necessary to steer as well as to regulate speed?—Hamilton Herald.

#### Long Distance Radio Record

#### Signals From San Francisco Station Heard 15 Degrees From South Pole

The newest New York skyscrapers are buildings of classic beauty, but they would not suit London, according to the view expressed by G. Topham Forrest, architect of the London County Council, who was in the United States studying town planning and building methods.

Raw apples from the Dominions to be admitted free; foreign raw apples to be taxed five shillings per hundredweight.

Canned salmon, canned lobster, crayfish, crabs and honey to be dutiable ten shillings per hundredweight when from foreign countries; free when from within the Empire.

#### British Obligations

#### War Debt to U.S. Was Worry Until Payments Arranged

France is not worried at all about the slow payment of the French war debt to the United States.

Nor is France worried unduly about the depreciation in the value of the franc outside the French Republic.

Britain never ceased to worry over British obligations on account of war borrowings from the United States until these obligations were put in the way of being repaid.

Britain never ceased to labor for the restoration of the pound sterling to its pre-war rate of exchange.

Today the pound sterling is quoted at \$4.62 3/8 in New York.

Britain has obligated her people to pay a yearly sum equal to the entire annual value of Britain's coal output. That sum equals at least \$500,000 per day for the next sixty years.—Toronto Telegram

#### Predicts Another World War

#### French Astronomer Repeats Warning

He Issued in 1914

The Abbe Mowbray, a noted astronomer, and the director of the Bourges Observatory, has created a sensation in Paris by hinting that the year 1928 may see another great war, or at least a critical period in the world's history.

His theory that solar activity and sunspots affect the temperment of nations, and even individuals, is responsible for this warning. In 1910, the Abbe Mowbray, then at Brussels, warned the governments of Europe of the impending disaster of 1914-1918, and he issues the same warning now.

"Wars correspond to magnetic storms," the Abbe declares. "The solar curve will begin to rise again in 1925, and reach its peak in 1928. I tender again to our governments the warning I gave in Brussels in 1910."

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

#### Device Eliminates Noise

#### Invention Permits Much Quieter Operation of Airplanes

The problem of eliminating the excessive noise attendant upon airplane flight has been practically solved as the result of experiments which have been in progress for some time, according to the Daily Express.

The new device, the paper says, has been invented which permits the noiseless escape of exhaust gases from the motor without interfering with the speed or lifting power of the plane, while a propeller that operates without the loud whirr has been devised by an ingenious arrangement of gears attached to the engine.

At the same time, by increased use of internal bracing, much of the noise caused by the rushing wind through wires and spars is avoided.

#### Western Horses Win At Ottawa

For the first time in the history of the Ottawa horse show and winter fair, western entries were received. Leslie and Davidson, of Watrous, Sask., won the Booth cup for the best six-horse team in the show.

#### Cure For the Blind

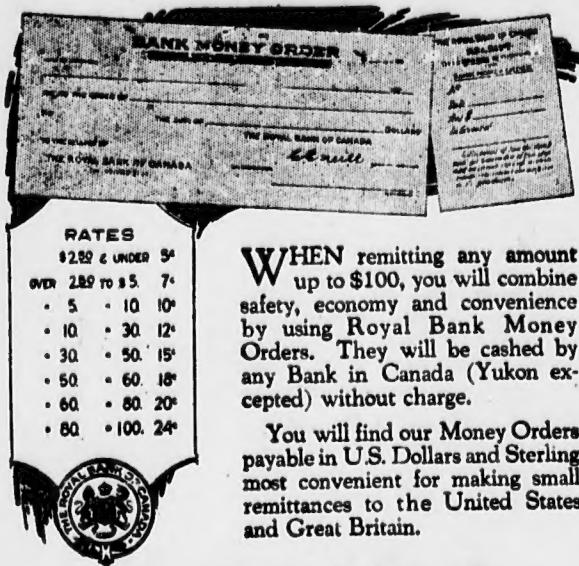

Veterans blinded in the war may have their sight restored if the optic nerve is intact, according to Dr. Bonnefond, Bordeaux, France, who purports to have restored at least partial sight to 14 out of 230 men who he treated.

#### NOTICE

#### GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA

#### APPLICATION FOR BEER LICENSE

Public notice is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell beer by the glass or open bottle for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta and the regulations made thereunder with respect to the following premises:

The Queens Hotel, situate on Lots five (5) and six (6) in Block Number Three (3) Registered Plan No. 249B, Crowfoot Street, Town of Gleichen, in the Province of Alberta. Beer sales room southeast corner of Lot six (6).

Dated at the Town of Gleichen in the Province of Alberta this 17th day of December, A. D. 1924.

MARTIN M. STUBBS,  
43  
Applicant.

The names of the winners of the David prizes for literature, awarded to the writers of the best French and English books entered in the competition for these prizes, have just been announced by the committee of judges. In the French section the first prize, \$1,500, went to Abbe Camille Roy for his book "A l'Homme des Erables," while in the English section Marjorie Grant Cook won first prize with her book "Another Way of Love."

The most successful year enjoyed by the Canadian Pacific Great Lakes Steamship Service in freight shipments since 1913 is reported by Mr. Duff, manager of that service, for the season lately closed. The whole fleet of package freighters for the first time since the outbreak of the Great War, has been constantly employed during the seven months in which the lakes are open. A feature was the very large increase in the export flour business, some 75 per cent of the 300,000 tons of flour carried eastward by the service having been destined for export. October was a particularly good month, the ships having transported in that month 58,000 tons of eastward bound milled flour and grain alone.
